SOFTWARE

Name of Speaker: DYLAN MCKEE
Company (representative of): Nebula Labs
Website: https://www.nebulalabs.co.uk

Background:

Dylan has a vast experience of mobile app development, developing his first iOS app - myAltitude - at the age of 13, which went on to achieve over 1 million downloads worldwide. Since then, Dylan has worked on countless apps over multiple mobile and web platforms for a variety of clients ranging from solo entrepreneurs and venture-backed start-ups to established SMEs and local government organisations.

Dylan studied Computer Science BSc at Newcastle University, and is also an alumni of the Ignite Accelerator Programme, completing their Summer 2014 programme and working with many of their portfolio companies on mobile apps.

Company/Business information:

Nebula Labs is a software house based in Newcastle upon Tyne, in the North East of England, offering mobile app development, web platform development, and bespoke software development for ambitious start-ups and entrepreneurs, and forward-thinking SMEs.

We take a unique engineering-driven approach to ensure that every solution we develop genuinely solves problems, has the potential to scale, and adds value to a business. We're your perfect technology partner.
We're based in Newcastle-upon-Tyne, but we love to work with amazing partners around the Northern Powerhouse, around the country, and across the globe.

What Dylan will be discussing:

Hear how young North East entrepreneur Dylan McKee started a successful tech start-up, Nebula Labs, at the age of 22, and how his previous endeavours have been somewhat less successful – yet absolutely vital in his journey as learning experiences. Dylan will cover how he started out with Nebula Labs, and the journey that got him there, as well as sharing some practical advice, tips, thoughts, and opinions on how you can start a tech or digital start-up in the region, whether you come from a technical background or not.
